

## Breakthrough Ease of Use

Installation, Configuration and Zoning wizards make setting up your SAN as easy as 1, 2, 3

### Spend time on your core applications, not managing your SAN

QLogic makes stack management automatic with easy-to-use installation, configuration and zoning wizards, plus tools for lifecycle management, including, monitoring, service and non-disruptive upgrades.

	<p><b>Wizards</b> Configuration, security and zoning wizards guide you from one step to the next, making SANbox stackable switches easy to install.</p>
	<p><b>Monitoring</b> Automatically monitor the health of your SANbox switches and notify you if an important event occurs.</p>
	<p><b>Non-Disruptive Fabric Upgrade</b> With non-disruptive code load and activation (NDCLA), you can upgrade and implement new SANbox firmware versions on the fly.</p>

	<p><b>Service Dashboard and Tools</b> Intuitive diagnostic tools make every SANbox easy to service.</p>
	<p><b>Heterogeneous QLogic Switches</b> Manage an entire network of QLogic fixed-port chassis and stackable switches.</p>

**Just add Storage and Servers**
